

Approvals

Like all ABB products, the AC500 components, are as well tested in conformity with the applicable European, North American and international guidelines, and approved by the organizations responsible. These include GL, DNV, BV, RINA, LRS and cUL. The products bear the CE symbol.

Certified quality

The entire process involved in creating an ABB product – from the original idea to the actual sale – is, of course, monitored by a quality management process certified under DIN ISO 9001.

In harmony with the natural environment

Protection of the natural environment is integral to ABB's corporate philosophy. This includes both resource-economy and the avoidance of problematical substances, plus recycling-friendly construction and long-lived products. These aspects are taken fully on board by an integrated eco-management system conforming to ISO 14001, whose implementation is repeatedly verified by regular eco-audits. And for newly developed products ABB now conducts a lifecycle assessment as well.
