Announcing ABB's New LED Bulbs and Switch Reset Buttons

ABB is pleased to announce a new line of LED bulbs for our CBK, CBG and Compact pilot devices. These LED bulbs are ideal for illuminated pushbuttons, switches, pilot lights, and emergency stop buttons. They are designed to mate perfectly with all CBK, CBG and Compact pilot devices and are available for voltages of 48, 60, 110-130VAC/DC as well as 12VDC. These LED bulbs are available in red, green, yellow, blue, or white.

We are also proud to announce our new KPR series of switch reset buttons. These reset buttons offer a larger face area and resemble our push button product line. They are available in six different colors with different text or blank; and may be ordered with a black plastic or metal bezel. The KPR3 provides a flush button appearance, while the KPR4 provides

an extended button appearance. A flexible joint (KA1-8047) is also available to avoid damage to the shaft. Both devices have UL ratings of 1, 3R, 4, 4X, 12, and 13.

Both of these products are compatible with ABB's 22 mm Compact Pilot Devices. This Compact Pilot Devices product line includes push buttons, selector switches, pilot lights and much more. These cost efficient pilot devices offer reliable performance, easy installation, and worldwide availability.

The new LED bulbs, KPR switch reset buttons, CBK, CBG, and Compact pilot devices are all available through ABB distributors.
