

ABB Wiring duct

Description

ABB wiring ducts are now also available in the 100 mm height and in a choice of six different base sizes (25, 40, 60, 80, 100 and 150 mm). These new wiring ducts join the established designs (with heights between 17 and 80 mm), bringing to 28 the total size combinations offered, all available with 8 – 12 mm and 4 – 6 mm slots.

Flexible thermoplastic wiring ducts (available in seven sizes) are ideal for every situation in which wiring is subject to flexion or torsion.

A new design of wiring ducts with circular knockouts in the sides to facilitate branch

connections using rigid and corrugated conduits has also been introduced for environments in which cables require greater protection against external agents (elevator rooms are a typical example).

The updated range is completed by installation accessories and tools: plastic rivets, wire stops, label tags, new wiring ducts bases, a new rivet gun and shears.

The 80 and 100 mm high versions feature cable holder moldings in the middle of the straight sections of the ribs.
