230VAC	—						1SAR501042R0005		

Description

- Single channel connection
- Feedback circuit for monitoring external contactors
- LED indicators for power and operation
- Output: 4 N.O. and 1 N.O. & 1 N.C. positively driven
- Overall width: 75mm

Application

The safety relay can be used to monitor Emergency Stop circuits and for monitoring of other protective devices (i.e., safety gates).
